Mexico City's Neighborhoods divided into 4 clusters

- Black circles represent stations not included in the analysis due to the low number of venues surrounding them.
- 4-Cluster model looks very similar to the 3-cluster model except for the 6 red stations on the north of the city.

Conclusion

- City center seems to be a more vibrant and tourist-oriented section of the city due to bar and hotel venues.
- Neighborhoods surrounding the city seem to vary between residential areas and neighborhoods with plenty of office space.
- Analysis could be expanded by including Mexico City's bus system to provide a more accurate and more encompassing picture of Mexico City.
